CAREER OBJECTIVE

As a new programmer entering the job market, I understand that I have a lot to learn. With a solid foundation in ReactJS/NextJS, NestJS and the ability to self-study, I believe that I can quickly catch up with the team and working culture at the company. I don't wait to become 'good enough' before contributing – I take action while learning, always strive to bring real value that company needs – even during the stage of perfecting my skills, achieving the goal of becoming a comprehensive Fullstack Developer in the next 2-3 years.

EDUCATION

Ajou University 2021-2025
